CONTINUING EDUCATION

CNE, CME, & CEU credit has been applied for this activity through the CDC Continuing Education Department.

See final announcement for full details.

NO commercial support was given to Heartland National TB Center or UT Health Science Center at Tyler for this educational program.

Target Audience

This conference is designed for community providers who will be screening and treating patients for tuberculosis infection in the community.

Conference Goal

The goal of this training is to build capacity with community providers by providing guidelines for screening and treating persons for TB infection.

Conference Objectives

Upon completion of this course, participants will be able to describe current epidemiology of TB, list groups of people who are more likely to be exposed to or infected with *M. tuberculosis*, list risk factors for progression to TB disease if infected with *M. tuberculosis*, describe tools used in testing for TB infection, discuss USPSTF recommendations, identify gaps in access to care that impact TB prevention, discuss social and legal impediments to care, discuss the role stigma plays in accessing health care, list considerations in determining treatment candidates, identify and implement treatment regimens used to treat TB infection, discuss opportunities and benefits to collaborating with the health department.

Format

The format for this course will include lecture-style presentations, with case studies. There will be ample time for questions and answers.

OUR VISION

The vision of Heartland National TB Center is to provide excellence, expertise, and innovation in training, medical consultation, and product development to reduce the impact of tuberculosis in our region.

OUR MISSION

The mission of the Heartland National TB Center is to build capacity with our partners. We will share expertise in the treatment and prevention of tuberculosis by: developing and implementing cutting-edge trainings, delivering expert medical consultation, providing technical assistance, and designing innovative educational and consultative products.
