

Target Audience

This conference targets public health departments and college campus workers involved in implementing tuberculosis prevention policies on their college campus.

Conference Goal

The goal of this conference is to provide information and education on the implementation of a model policy on college campuses that will serve as a TB elimination strategy. It will emphasize the importance of screening, testing, and evaluating students on college campuses as a primary means of TB control.

Conference Objectives

Participants will be able to: understand the public health threat of TB and drug-resistant TB for the campus population and worldwide, learn strategies for implementing model TB prevention and control practices on their campus, and identify the roles of local, state, and federal public health agencies in the prevention and control of TB.

Format

The format for this conference will include lecture presentations and interactive panel discussions, prevention clinic. Ample time will be allowed for questions and answers.
