

Conference Goal

The goal of the conference is to provide an in-depth training experience covering the knowledge and skills essential for nurse with primary responsibility for TB case management. The course is designed to provide coverage of the evaluation, treatment and case management of medically and psychosocially difficult-to-treat patients. The workshop is designed to be go beyond the basic TB curriculum and to enhance the participant's ability to be accountable for all facets of case management by capturing the experience and competencies of expert TB public health nurses now working in settings throughout the Heartland Region.

Conference Objectives

Participants will be able to competently practice TB case management including: partnering with the community, planning; conducting contact investigations, monitoring response to treatment, performing toxicity assessments, implementing measures to reduce TB transmission, identifying and managing foreign-born persons at risk for tuberculosis, diagnosing and managing pediatric TB, TB/HIV and other high risk patients, performing case review and quality assurance, balancing responsibilities for public health with patient's needs and preventing non-compliance through use of DOT and enablers, communication skills, proper use of an interpreter and cultural sensitivity.
