CONTINUING EDUCATION

CNE: The Centers for Disease Control and Prevention is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Heartland National TB Center provides up to **18.0** nursing continuing education contact hours for successful completion of this educational activity.

OUR VISION

The vision of Heartland National TB Center is to provide excellence, expertise, and innovation in training, medical consultation, and product development to reduce the impact of tuberculosis in our region.

OUR MISSION

The mission of the Heartland National TB Center is to build capacity with our partners. We will share expertise in the treatment and prevention of tuberculosis by: developing and implementing cutting-edge trainings, delivering expert medical consultation, providing technical assistance, and designing innovative educational and consultative products.

NO commercial support was given to Heartland National TB Center or UT Health Northeast for this educational program.

Target Audience

This course is intended for nurses and public health staff who are actively engaged in the identification, case management, and treatment of patients with tuberculosis infection or disease.

Conference Goal

The goal of this course is to provide an in-depth training experience covering the knowledge and skills essential for the nurse or (LVN, BSN) acting as an RN with primary responsibility for TB case management. The workshop will go beyond the basic TB curriculum and enhance the participant's ability to be accountable for all facets of case management.

Conference Objectives

Upon course completion, participants will be able to competently practice TB case management including: describe current epidemiology of TB; diagnose and manage TB infection and TB disease; monitor response to treatment; perform drug toxicity assessments; describe current laboratory methods, common IGRA tests, and basic TB radiology; diagnose and manage TB in pediatric patients; describe the steps to a contact investigation; assess the nutritional needs of TB patients; describe infection control measures to prevent the spread of TB; discuss how to increase patient adherence through the use of DOT and enablers; discuss collaboration with private providers; identify psychosocial factors that affect TB treatment; recognize foreign born populations as a high risk group and discuss barriers and special considerations in dealing with these groups.

Format

Live event presented in a lecture format with interactive discussions.
