Study 31

- Treatment shortening study for TB disease
- Rifapentine +/- moxifloxacin containing regimens for shortening treatment of active TB disease to 4 months
- Started January 2016, final data collection was July 2020
- San Antonio VA in partnership with City Chest Clinic
 - 1 of 33 study sites worldwide
 - 1 of 5 US sites
- San Antonio remained one of the top enrolling sites during the course of the study
- Our very own Dr. Barbara Seaworth worked with CRAG to assure patients were treated humanely and given equal opportunity to participate

Study 37

- Treatment shortening regimen for TB infection
- Compare the safety and effectiveness of 6 weeks rifapentine vs:
 - 3HP
 - 3HR
 - 4R

Acknowledgments

Dr. Marc Weiner

A champion of TB research in the TBTC,
retired this year
