*****The registration deadline for this program is Monday, May 22, 2023*****

TARGET AUDIENCE

This course is designed for the TB professional who is responsible for training staff and other health care workers on the proper placement and reading of the tuberculin skin test (TST).

COURSE GOAL

The goal of this training is to provide an in-depth educational and training experience for the health care worker who is responsible for screening, administering, and interpreting a TST and is also responsible for conducting a TST training for their institution.

COURSE OBJECTIVES

At the completion of this training participants will be able to 1) discuss basic adult learning principles, 2) list the steps required to set-up a TST workshop, 3) identify persons for whom targeted TB skin testing is indicated, 4) demonstrate the placement of a TST, and 5) employ effective team skills by sharing information effectively.

COURSE FORMAT

The format for this course will be lecture-style presentations with an interactive skill building practicum. We will allow ample time for questions and answers.
