

1

2

Goal

The goal of this course is to provide training that covers the knowledge and skills that are essential for the nurse case manager who is responsible for the care of patients with active TB disease and their contacts.

3

Course Prerequisites / Requirements

While there are no mandatory prerequisites to this course, it is highly recommended that all participants have completed the *Introduction to TB Nurse Case Management Online course*.

To complete this course, participants must attend all live meeting sessions, complete the 4 module surveys after each live meeting session, and complete the final course survey.

4

Agenda

All sessions meet online from **1:00 PM – 2:30 PM CST**

- Module 1: Basics of TB and Screening • **Thursday, May 18, 2023**
- Module 2: Diagnosing TB and Preventing Transmission • **Thursday, May 25, 2023**
- Module 3: Treatment and Medical Management of TB • **Thursday, June 1, 2023**
- Module 4: Assessing and Guiding the Patient through Treatment • **Thursday, June 8, 2023**

5

Continuing Education

The University of Texas at Tyler is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation. To qualify for receiving continuing education, all sessions must be attended and an evaluation completed. Partial credit will NOT be given. Upon completion of the course and evaluation, certificates will be distributed by email within two weeks after the course. This activity's planners and presenters have no relevant financial relationships to disclose.

The University of Texas at Tyler School of Nursing designates this activity for six (6) nursing contact hours (CNE).

6

7

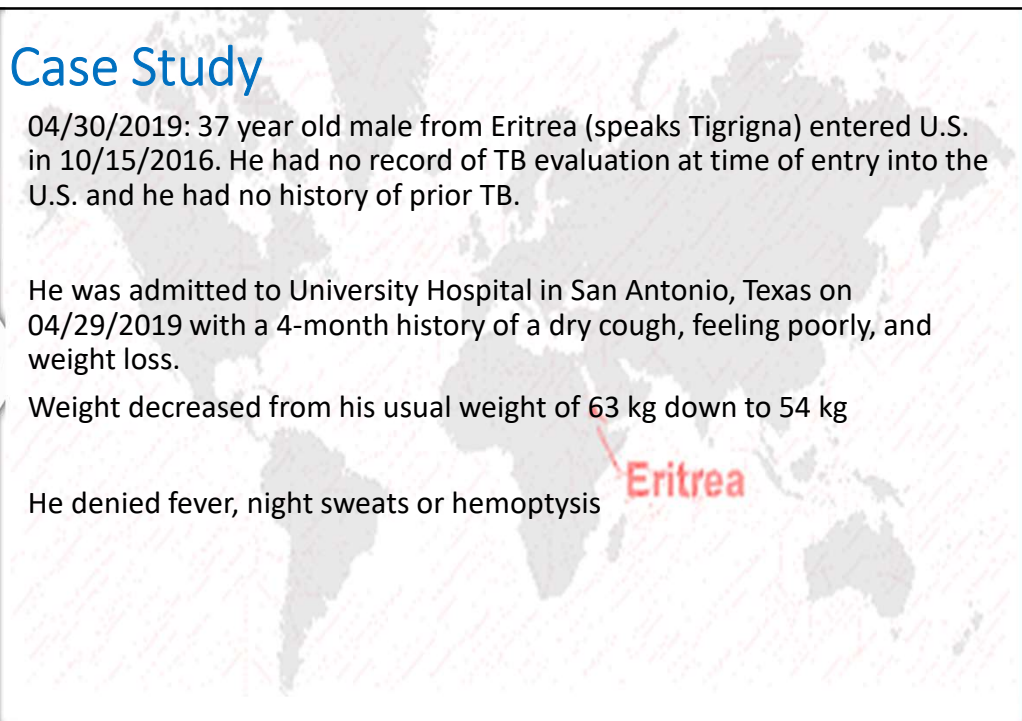

Case Study

04/30/2019: 37 year old male from Eritrea (speaks Tigrigna) entered U.S. in 10/15/2016. He had no record of TB evaluation at time of entry into the U.S. and he had no history of prior TB.

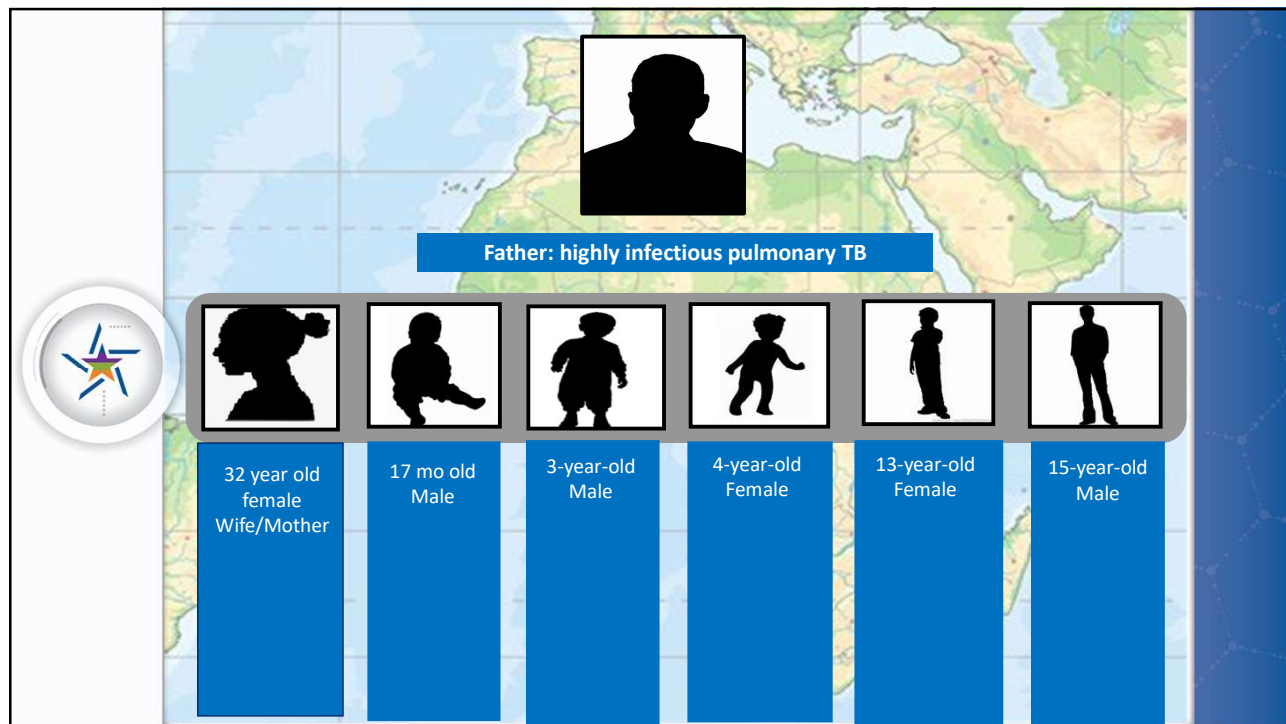

He was admitted to University Hospital in San Antonio, Texas on 04/29/2019 with a 4-month history of a dry cough, feeling poorly, and weight loss.

Weight decreased from his usual weight of 63 kg down to 54 kg

He denied fever, night sweats or hemoptysis

8

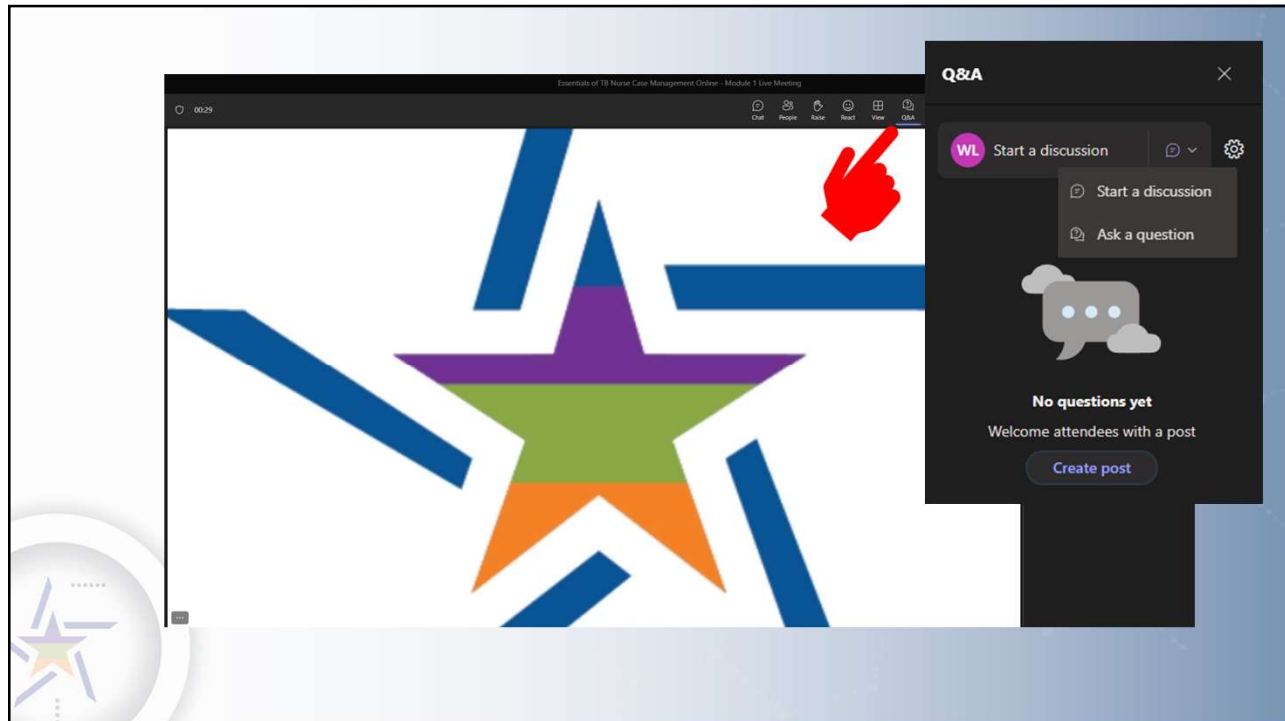

9

Today's Agenda

- **Transmission and Pathogenesis of TB**
Salma Lerma, MSN, RN, Heartland National TB Center
- **Principals of TB Nurse Case Management: Why Are We Here?**
Catalina Navarro, BSN, RN, Heartland National TB Center
- **Tuberculosis Screening and Testing**
Dr. Lisa Armitige, MD, PhD, FACP, FAAP, FIDSA, Heartland National TB Center
- **Importance of a TB Medical Assessment**
Dr. Barbara Seaworth, BS, MD, FIDSA, FACP, Heartland National TB Center
