COURSE GOAL

The goal of this course is to provide an introductory training experience covering the basic elements, knowledge, and skills essential for the nurse case manager responsible for the care of patients with active TB disease and their contacts. This course also provides new nurses with the foundation necessary to attend Heartland's *Essentials of TB Nurse Case Management Online* course.

COURSE OBJECTIVES

Upon course completion, participants will be able to define case management as it pertains to TB, identify components of case management, describe components of an effective TB prevention and care program including personal respiratory protection, discuss the guidelines of contact investigation evaluation and treatment of persons exposed to TB, and list criteria for completion of TB treatment.

COURSE FORMAT

The format for this course will be web-based via Canvas Catalog and Microsoft Teams. This course will include live presentations, self-paced modules, online topic discussions, and homework assignments to be completed between the live presentations. Participants will have ample time for questions and answers during the live group discussions.

TECHNOLOGY REQUIREMENTS

To access and view this course, you will need a computer with internet access. Audio for this web-based training will be through your computer speakers. We recommend that you check your system for compatibility and connectivity prior to the course. Our staff will send instructions on how to test your system along with your acceptance letter.

For technical assistance, contact Phillip Ring at Phillip.Ring@uttyler.edu.
